

## WALZEN IRLE has been the worldwide leading supplier of Temperature Controlled Calender Rolls & Calender Roll Shells for the Paper Industry

With the current situation due to COVID-19, WALZEN IRLE has taken all measures required to protect our employees. The production within the foundry and machine shop continues with full work load.

More recently IRLE was happy to sign another large order for Thermo-controlled rolls, calender rolls and roll shells with one of the OEM's and we will remain optimistic to fill up our open capacity for this and the following years. Our **200th anniversary of roll casting** in 2020 is a further milestone and shows our success story.

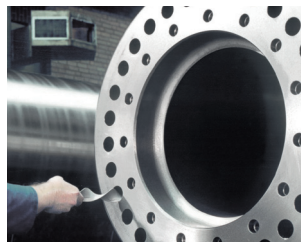

First choice among paper machine OEM's for all calender types – whether you have a machine produced by the old Beloit Company, Andritz, Valmet, Metso, Escher Wyss, Sulzer Papertech, Voith, GL&V – it is highly likely your machine is fitted with WALZEN IRLE calender rolls.

Now providing direct representation to the Paper Industry across the US!  
**WALZEN IRLE Benefits include:**

- On site technical support to aid in maximizing the value and life of your rolls
- Cost effective replacement of temperature controlled rolls and CalRolls, incl. roll shells
- Streamlined order processing and lead time to ensure timely replacement
